Spatio-Temporal Variation of Tropospheric Nitrogen Dioxide Over Southwest Nigeria

The study investigates the spatiotemporal trend of NO_2 using Copernicus Atmosphere Monitoring Service (CAMS) data between 2010 to 2020. An average of 3.97×10^{15} mol/cm^2 with an increase of 7.63% over the years was discovered in the course of the study.

2023

Impact of Global warming on Rainfall Patterns

The aim of this research was to investigate the impacts of global warming on rainfall patterns.

Analyzing the temporal variability of temperature and rainfall.

Observing the spatial distribution of minimum and maximum temperature.

And investigating the relationship between maximum and minimum temperatures on rainfall patterns.
